Summary

A full stack developer experienced in developing and maintaining websites, web services and internal applications. Fluent in French and English, I am a self-starter with an aptitude for learning new technologies and working autonomously.

Experience

Freelance Web Developer — 2017-Present

With a colleague, setup apexdesigns.ca. A company devoted to giving smaller contractors a larger web presence. Activities included contacting prospective clients, organizing meetings to discuss client requirements and preparing quotes.

Technical Skills

OS: Windows, Linux (Ubuntu)

Languages: Node JS, Phantom JS, Javascript, Python, HTML, SCSS, Rest API

Database: SQL, MongoDB

Scripting: Ruby

Tools: Visual Studio, GIT, MySQL, Microsoft SQL Server

Notable Recent Work (Viewable at ericbellamy.ca)

Apex Designs

Languages: Javascript, EJS, HTML, CSS, NodeJS, MongoDB

Created a website that implemented a custom booking and contract system. Made use of custom loading scripts to achieve hyper efficient page speeds.

Acapollo

Languages: Python, NodeJS, Javascript, EJS, HTML, CSS, MongoDB

Created a scraping software that scanned social media for songs, validating and formatting them. A website was built to deploy the songs into a custom built music player that integrated with the Soundcloud API.

Horizontal Service

Languages: NodeJS, Sockets, Child Process, Puppeteer, Javascript

Created a horizontally scaling network that makes use of web servers and sockets to implement a master - child server relationship. The initial project executed browser automation tasks across 10 child servers.

Education

Carleton University - Ottawa, CA

3rd Year Student, Honours B.Sc. Computer Science: Internet Security Stream
